

Aiden Hovren

Entrepreneur · Operator · Systems Builder

Montana, USA · aidenhovren.com (<https://aidenhovren.com>) · [LinkedIn](https://linkedin.com/in/aidenhovren) (<https://linkedin.com/in/aidenhovren>) · [GitHub](https://github.com/ahovren) (<https://github.com/ahovren>)

Entrepreneur and systems-oriented operator with experience building early-stage ventures and executing in high-accountability environments. Blend of operational leadership, curriculum development, and hands-on digital systems implementation—focused on turning ambiguity into working processes, products, and teams that perform under pressure.

VENTURE & OPERATING EXPERIENCE

Founder — Ironvael 2025–Present

Venture studio

- Build and iterate early-stage initiatives across software, operations, and digital infrastructure.
- Translate ideas into scoped plans, testable builds, and repeatable execution systems.
- Operate with capital efficiency and rapid feedback loops to validate direction fast.

Digital Transformation Lead (Volunteer / Project) — 2025–Present

TFS Volunteer Fire Department

Department digitization and operational modernization initiative.

- Led digitization of internal processes to improve reliability, access, and operational readiness.
- Designed practical workflows and documentation to reduce friction and standardize execution.
- Implemented tools and systems aligned to real-world constraints (speed, clarity, usability).

SERVICE & LEADERSHIP

Volunteer Firefighter — TFS Volunteer Fire Department 2025–Present

- Responded to emergency calls including fires and vehicle accidents; assisted in containment, operations, and hazard mitigation under high-stress conditions.
- Maintained readiness through regular training in fire suppression and equipment operation; supported community safety initiatives and prevention programs.

MH-60S Subject Matter Expert (SME) — Curriculum Development & Instruction 2024–2024

- Developed and implemented 20 technical training modules adopted by the US Navy, standardizing aviation safety and technical readiness.
- Served as technical knowledge resource for aircrew operations and safety standards.

UAS Mission Payload Operator — United States Navy 2023–2024

- Operated and monitored mission payload systems, ensuring system reliability, data accuracy, and adherence to security protocols.
- Reviewed and annotated payload imagery to identify and classify targets and POIs; documented metadata and timestamps, then handed concise briefs to pilots to support mission decisions.

- Coordinated flight operations and instructor-led training across 12 rotary-wing squadrons, supporting 300+ aircrew and pilots alongside Weapons & Tactics instructors to optimize mission scheduling, resource allocation, and operational readiness.
- Served as a Squadron Search and Rescue (SAR) Instructor for 30 aircrewmen, leading rescue training evolutions, maintaining qualifications and currencies, and ensuring compliance with Navy aviation and safety standards.

SKILLS

Operations: Process design, SOPs, systems thinking, execution under pressure, training standardization

Digital Systems: Web development, tooling selection, workflow digitization, documentation, basic automation

Leadership: Team coordination, instruction, stakeholder alignment, high-accountability environments

EDUCATION & CREDENTIALS

Lean Six Sigma Green Belt

Additional training and details available upon request
